## Vendôme Side Table

This two story side table is made from mahogany wood with border inlays in a lighter colored wood.

The inspiration for this piece comes from Directoire Style, a 15 year period in late 18th Century France. You can specifically see the reference in the curvature of the legs, and the inlays as they used basic shapes for tables and chairs and there was a revival of inlays. They used mostly solid wood for building furniture as other materials was seen as too bourgeois.
